

Reel Green BC serves as a gateway to information and resources that promote positive environmental practices in BC's film and television production industry.

Camera & Sound

- ★ Unplug video players, television monitors and other similar equipment when not in use
- ★ When purchasing or renting equipment, ask about energy-efficient alternatives or enquire about more efficient ways to use the equipment
- ★ Where quality allows, use digital processes for filming and sound recording
- ★ When using film, check that your suppliers have end of life management programs compliant with local regulations for disposal of photographic processing chemicals
- ★ Avoid sending waste film to landfills by asking your supplier about recycling or other eco-friendly disposal options

If you have any other suggestions, please email additional best practices or good news stories of environmental stewardship to info@bcfilmcommission.com
