

Reel Green BC serves as a gateway to information and resources that promote positive environmental practices in BC's film and television production industry.

Grip & Electric

- ★ Use hydro electric based power when possible to avoid emissions from generators
- ★ Replace flickering, dim and burned out lamps
- ★ When replacing light bulbs, replace with lower-wattage, longer life, cool lamps or energy-efficient alternatives such as fluorescents
- ★ Use dimmers to rest lights between setups rather than switching lights on and off
- ★ Encourage the use of fluorescent lights for work areas on location
- ★ Use environmentally considerate textiles on frames instead of poly based materials for bounce and filtration
- ★ Recycle colour gels so that they can be used in future production

If you have any other suggestions, please email additional best practices or good news stories of environmental stewardship to info@bcfilmcommission.com
